TESTPOINT™

- WEB-BASED PRE-ADMISSION & ASSESSMENT TESTING

At the heart of what makes TestPoint™ special are the test questions themselves. Test questions have been researched and developed by professional educators and reflect what students should know in their current grade. One of the tremendous strengths of TestPoint™ is that the content and academic standards in the tests were drawn from the many years of experience of the test authors and from the different curriculums, achievement tests, and assessment tools currently used in Christian schools. With TestPoint™, schools will have the opportunity to evaluate more accurately how new students compare academically to the current academic levels in the school.

Educators contend that to be effective in the delivery of instruction to students, proper academic assessment should take place whenever students enroll in schools. Pre-admission testing can help determine what students know and where they should be placed in the school; however, schools are responsible for establishing their own academic requirements for admission. With TestPoint™, schools can leave behind current methods used for academic placement which range from using manual achievement tests, school-made tests, or no tests at all. The research indicates that when teachers are provided with accurate academic information when new students enroll, then they can provide the best education possible. TestPoint™ helps schools accomplish this task through accurate pre-admission testing in language, reading, and math. Tests are scored immediately and are instantly available for review. Future updates of Testpoint will offer assessment testing for individual subjects and achievement testing in Grades K-12.

THE DEVELOPMENT OF TESTPOINT™ HAS BEEN GUIDED BY JOE HAAS, Ed.D. DR.
